

BRASS HAMMER

Soft-faced brass hammer is designed for the safe use of Flare Tools and Rerounding Tools as the brass head absorbs some of the striking shock. It pairs well with flaring tools used on Type K soft copper tubing.

ROUND IT® STRAIGHTENER/REROUNDERS

FEATURES

- **Take the trouble out** of handling copper rolls by using Reed Round It® tools for straightening and rerounding.
- Provides the **needed leverage** to guide tube into position for fit-ups.
- Tools will **quickly pay for themselves** in material, labor and time savings.

Time-and-material saving **CSR2** Round It® Straightener/Rerounder handles 1 1/2" and 2" K annealed copper. Grips the end of a coil so uncoiling is easy; rerounds oval tubing anywhere along its length so a cutter will track or the fitting will seal properly. Provides safe grip when flaring, and guides copper into alignment for easier fit-ups. **RCR3/4** and **RCR1** tools are especially useful when tubing is wet for a solid grip when straightening and fitting up. **RCR341** offers all the same features as both RCR1 and RCR3/4 and includes jaws for either size tubing. The long-handled RCR rerounders are beneficial when extra leverage is needed.
